## **DETAILED ACTION**

### ***Response to Amendment***

1. Claims 1, 5 and 6 have been amended as requested in the amendment filed on March 01, 2005. Following the amendment claims 1, 3-6, 22, 24-26 and 33 are pending in the instant application.

Claims 1, 3-6, 22, 24-26 and 33 are under examination in the instant office action.

2. The Text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Any objection or rejection of record, which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

4. Prosecution on the merits of this application is reopened on claims 1 and 3-6 in view of the newly discovered reference(s). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(e) as being anticipated by

Glucksmann et al., US Patent 6,586,205 of July 01, 2003, filing date February 11, 2000.

Art Unit: 1646

Claims 1 and 3-6 are directed to polynucleotides that are at least 95% identical to the polynucleotide of SEQ ID NO: 1 or encoding a polypeptide of SEQ ID NO: 2, vectors, host cells and methods of producing such polynucleotides. US Patent 6,586,205 discloses polynucleotides, which are 99.7% identical to the instant claimed polynucleotides (see copies of the sequence alignment attached to the instant office action), as well as vectors, host cells and recombinant methods of protein production (columns 28-31). Thus, disclosure of US Patent 6,586,205 anticipates the instant claims 1 and 3-6 based on the priority of the filing date.

### ***Conclusion***

7. Claims 1 and 3-6 are rejected. Claims 22, 24-26 and 33 are allowed.
